Cnr Old Princes Highway and Browns Rd, Monarto SA (7 km west of Monarto Zoo entrance)

Jabbok White Dorper Stud started in 2006 with a desire to enjoy the challenges of breeding a quality animal. We have selected stock with good genetics, focusing on

- conformation
- excellent shedding ability
- meat quality
- fertility and temperament

We are Brucellosis Accredited and Dermatosparaxis Negative.

As a small stud we aim to achieve a high quality animal, promoting

- good muscling characteristics,
- body length and
- shoulder width.

The breed is well balanced, appealing, and easy to manage. Key benefits are:

- no crutching,
- minimal or no shearing
- reduced potential for fly strike and lice infestation.

These animals have proved to be very satisfying and rewarding, easy to contain and handle.

Inspections Welcome
