

# Bridgetown Dorper Stud

**Flock No: D018**

**Owner JC and SD Jeffery**

Collin and Susan Jeffery have been developing their Dorper Stud since 1997. They began by running the fullblood stud in conjunction with an up-grade operation taking their cross bred flock through to F6 and F7. They have now sold all their cross bred animals and are concentrating on a small high quality pedigree flock. Selection is undertaken using both the Breed Standards inspections and Lambplan. This provides high quality sheep that perform well objectively and subjectively. Contact them directly for sale details.
