Brucellosis Acc reditation number : CW 06/7

OJD status: 6 pts vacc

OJD accred no:

Lambplan : Yes

Description: The stud was established in January 2004, with the purchase of quality Amarula and Springvale ewes. Our bloodlines are predominately Tien Jordaan. We are growing our flock to 200 plus type 4 and 5 ewes. We also run a flock of F3 & F4 commercial ewes near lake Eucumbene (in the snowy mountain area). Our mission is to produce a highly fertile and fecund flock of high yielding meat sheep with good shedding suitable to our harsh environment
