Number:  
OJD Status ie MN1, MN2  
OJD Accreditation  
Number:  
Lambplan Participant No  
Stockscan Participant No  
Description: (maximum 100 words) Our stud was established with predominantly Type 4 ewes from Amarula and Type 4 Sire Amarula 'Douggie' 02-0284. We have used independent advice from South African Inspectors and performance figures from Lambplan as we strive to produce highly productive, low maintenance, meat sheep. Our strategy of acquiring proven sires continued with Type 5 Sire Kaya 04-7949 - 'Bullo'. His Dorper\$ Index of 140 (Feb 09) is the highest for a Dorper Sire. He has boosted the quality and performance of our stud animals. The addition of Type 4 Winrae 'Bruce'- 070901 will further boost muscling, growth and maternal traits.
