

## **Alpine Dorpers**

**Flock No : D623**

**Owner : Harry & Nicola Bussell**

Description : Alpine Dorpers is located 50km from Wangaratta, at the gateway to Australia's high country. Coming from a commercial prime lamb background, our aim is to produce Dorpers with high fertility, large eye muscles, good shedding and mothering ability and sound conformation and feet. We are committed to and trained in the South African Typing system, which is used alongside Lambplan, for selection decisions in both commercial and stud flocks. Our stud sheep are some of the very best animals available in Australia today. They represent bloodlines from Kaya & Tien Jordaan, Winrae, Amarula, Gideon Viviers, John Dell, Woelewater & Douwana studs.

Business Name : Alpine Dorpers

Flock Number : D623

Year Founded : 2009
