

Etiwanda White Dorper Stud

Flock No: 44

Owner Andrew & Megan Mosely

Enterprises on our properties must be low input and profitable, whilst improving the natural environment in which we live and the White Dorpers are very easy care and return extremely well on the money invested in them. The White Dorper is thriving in our rangeland country and the recent drought has reinforced the suitability and profitability of the White Dorper to our extensive semi arid rangeland country. Never before have we been able to market prime lambs from our property and we now have this option in place.

We welcome you to our website and property to view White Dorpers running extensively and profitably. Please call to arrange a visit! You'll be glad you did!

Recent achievements:

At the 2004 National Dorper & White Dorper Ram Sale in Dubbo NSW, Etiwanda White Dorpers achieved the highest average price of the sale at \$3350.00/hd.
