Brucellosis Accred. #:	OB09/125		
OJD Accred. #:	NTRBA (Regional Biosecurity Plan)		
Description:	<p>Galaxy White Dorper Stud was established in 1999, using selected classified Stud seedstock.</p> <p>Renowned South African judge Ron Van de Merwe selected stock to enhance the already recognised attributes of these early maturing, moderately framed sheep with increased meat and muscle. Selecting elite T5 ewes to use in our ET programs, and focusing on fertility, further lifted our flock's productivity.</p> <p>Success in the Show ring, particularly in Objective Measurement classes, and repeat sales to both Stud and commercial breeders, encourages us to continue to strive for further genetic gain.</p> <p>We offer commercially relevant, quality stock at realistic prices.</p>
