

# Spring Hill White Dorper Stud

**Flock No: 126**

**Owner Peter and Mary Lynch**

Spring Hill White Dorper Stud is the oldest White Dorper stud in Queensland. It was established near Toowoomba in 2001.

Our stud is based on imported embryo stock from the South African Studs of Floors Brand, Dries Wiese and Martin Compion Jnr. We have subsequently selected breeding stock from Kaya White Dorper Stud and other leading Australian studs.

Our aim is to breed a White Dorper true to breed standard, with size, length, muscling and shedding ability, suitable for the Australian meat sheep industry.

In 2010, we relocated our stud to Goondiwindi where we have the opportunity to undertake a rapid expansion of our breeding ewe flock. Embryo transfer programs are being regularly used with our superior ewes.

We are a member of Lambplan and continue to regularly show our stock to ensure that our flock is true to type.

We are able to export semen and embryos to most countries.

Visitors are always welcome.

**Stud Prefix** Spring Hill

**Address** P O Box 495, Goondiwindi, QLD 4390.
