Lambplan Participant No  
Stockscan Participant No  
Description: (maximum 100 words) MATCHLESS White Dorpers is based on the importation of some of the best genetics available in South Africa.

Our sheep are paddock reared and are expected to thrive under paddock conditions. We maintain a rigorous health regime with regular vaccinations and faecal tests. Our sires and dams are Dermatoparaxis-free and we are Brucellosis accredited. We maintain meticulous records which enable us to track the performance of all our animals

Through on-going selection for structural soundness, fertility, mothering qualities, muscling, length and shedding, we produce sound, healthy, fertile animals which thrive in tough conditions, mature early and are "MATCHLESS Meat Makers"™.
