Description: (maximum
100 words)

Jerrara White Dorpers is located between Hillston and Booligal on the banks of the Lachlan River. Our flock is raised on a mix of native and introduced grasses and saltbush. We have a small stud targetting a breeding herd of around 100 ewes. Genetics from Etiwanda and Goragilla have been used from their award winning sires and dams. We aim to produce a meaty medium framed animal with an ability to handle the harsh weather experienced in the western division of NSW.
